## What is a Condulet™?

Conduit outlet bodies, also known as Condulet™ are installed by threading to Rigid or Intermediate conduit in raceway systems. They act as pull-outlets for conductors being installed and provide openings for making splices and taps in conductors. They connect conduit sections, bends and provide taps for branch conduit runs. Condulet™ also provide for access to conductors for maintenance and future system updates.

Microscopic Zinc Whisker

## Zinc whiskers: what are they and how do we deal with them?

The telecommunications and high tech industry have experienced a resurgence in zinc whisker failures. This is due to the microelectronics that are commonly found in today's data-centers and sophisticated electronics. These tiny whiskers create havoc when they find their way into these microelectronics.

Eaton's brand signature

Eaton is an intelligent power management company dedicated to improving the quality of life and protecting the environment for people everywhere. We are guided by our commitment to do business right, to operate sustainably and to help our customers manage power — today and well into the future. By capitalizing on the global growth trends of electrification and digitalization, we're accelerating the planet's transition to renewable energy and helping to solve the world's most urgent power management challenges.
